2. Following an exchange of cables (Refs. B and C) to define the specific requirements, Intelligence Division contacted the ordinance engineers in the Technical Support Division, DDP and obtained their recommendations as to a suitable weapon. The specific requirement was for a small compact handgun suitable for use in self defense [redacted] without extensive weapons training. It was additionally stipulated that the weapon must be lightweight, easy to operate, reliable, and rugged.

3. On 9 January TSD's recommendation, the German Walther PP 7.65 mm (.32 caliber) automatic was submitted to [redacted] (Ref. D) and accepted the following day (Ref. E).

4. A requisition for these weapons was submitted to Materiel Division on 10 January (Ref F). Intelligence Division completed its portion of the requirement in six days.

5. On 30 January Materiel Division received the weapons. Shortly thereafter, one pistol was delivered to [redacted] ASD/R&D/OSA, for holster design and selection of the best location and means of securing same on harness or outer garment.

6. Three months later (27 April 1967) [redacted] requested the Life Support Section, [redacted], headed by [redacted] to fabricate suitable holsters and "select locations where a holster could be attached allowing immediate access without affecting comfort, mobility, pressure suit or parachute functions and without interfering with cockpit controls" (Ref. G). One pistol was shipped to [redacted] for use in completing these tasks.
